The sieve basket for small parts to hold accessories during the cleaning process.

The high-quality sieve basket for small parts made of stainless steel is designed to hold accessory parts of medical instruments during the cleaning process. The Hupfer sieve basket for small parts is an indispensable companion when using medical instruments in hospitals, doctors' practices, and other medical facilities. The sieve basket frame made of robust stainless steel wire, with a sieve basket and lid made of fine-mesh stainless steel fabric, provides a secure storage solution and good protection for the medical small parts. Thanks to a secure quick-release mechanism, the valuable instruments remain permanently protected in the sieve basket throughout the entire cleaning process. The special wire fabric ensures optimal flow and maximum cleaning effectiveness for the highest hygiene standards.

- Fine mesh fabric allows for secure retention and protection of small parts
- Quick-release keeps the sieve basket permanently closed and ensures the safe retention of small parts in the sieve basket
- Special wire mesh ensures optimal flow and maximum hygiene
