Hupfer offers a rail connection for sliding shelves that enables the sorting and organising of stored goods. This feature supports the efficient handling and transport of materials within a storage system.

Discover the rail connection for sliding shelves from Hupfer – the perfect solution for efficient storage and organisation in the gastronomy and medical sectors. This robust connection made of high-quality stainless steel impresses with its durability and stability. With compact dimensions of 140x31x11 mm and a practical bolt design, the rail connection ensures effortless assembly and secure hold. Benefit from the optimal use of space and the ease of handling that the rail connection for sliding shelves offers. It allows for a flexible arrangement of your shelving systems, significantly enhancing efficiency in logistics. Rely on quality and functionality – the rail connection from Hupfer is the ideal choice for professional applications.

- **Precise dimensions:** 140x31x11 mm – optimised fit for sliding shelves.
- **Robust construction:** Made of high-quality stainless steel – ensures durability and corrosion resistance.
- **Integrated bolts:** Easy installation – provides stable connections and enhances safety.
- **Versatile application:** Ideal for commercial kitchens and medical facilities – supports efficient logistics solutions.
