Height:	1877 mm

Similar to illustration, technical modifications reserved. Without decoration.

Push-through protection made of electropolished stainless-steel.

The push-through protection for shelving uprights in the form of a stainless steel grid serves to secure the stored goods laterally. The Hupfer push-through protection for shelving uprights is a robust and reliable safety device for maximum safety and efficiency in your warehouse. The cleverly designed construction allows for effortless and optional hanging and removal of the stainless steel grid in the shelving upright. The push-through protection is space-saving and enables the continued efficient use of the storage area. The stainless steel grid is electrolytically polished and particularly durable, easy to maintain, long-lasting, and maintenance-free.
