Technical data

Modular dimension:	115 mm
Insertion type:	Lengthwise insertion
Payload:	100 kg
Weight:	124 kg
Width:	1052 mm
Depth:	722 mm
Height:	1591 mm

Similar to illustration, technical modifications reserved. Without decoration.

Isolated trolley for the transport of meals on trays

Completely enclosed, double-walled insulated transport trolley made of stainless steel. The design and material selection are intended for years of daily use under high mechanical stresses. Smooth surfaces inside and out allow for hygienic cleaning of the trolley. Surrounding bumpers made of solid plastic material on the chassis and roof effectively protect the trolley from damage. Quality wheels according to DIN standards and four push bars enable easy handling of the trolley. Well-sealed doors and complete insulation of the body ensure compliance with the cold chain and temperature requirements according to HACCP. With a variety of equipment options, the transport trolley can be customised to meet individual needs. The interior of the trolley is fully welded and seamless to meet maximum hygiene requirements. Together with high-quality stainless steel wheels, the transport trolley is suitable for cleaning in trolley washing facilities.
