Compound sieve as combination of strainer bowl and lid, in closed state for provision of sterile supply instruments; open lid serves as disposal strainer for used instruments.

Strainer bowl and lid, each measuring 9.5 × 9.8 × 2.0" (240 × 250 × 50 mm), safeguarded against shifting through Hupfer locking mechanism. Designed for easy cleaning, can also be used as rinsing basket, made of high-quality electro-polished stainless steel round material. Compound sieves suitable for insertion into sterile supplies baskets; opened sieves stackable onto one another thanks to special shape of base frame.

The Hupfer compound sieve features a special design with two identical mesh baskets that can be combined using a special lock mechanism to form a combined supply and disposal container tray.
