The Isobox Flex is designed for the delivery and temperature-safe transport of food components in GN containers or on GN trays over long, demanding transport routes. With the Isobox Flex M, you can transport food in one compartment.

The Hupfer Isobox Flex M for 19×GN 1/1 offers a versatile and reliable solution for temperature-safe transport of food components in commercial catering. Featuring a lightweight aluminium frame with robust corner bumpers, this insulated unit ensures excellent temperature retention for both hot and cold meals. The innovative mounting system allows quick, tool-free replacement of heating, cooling, or neutral modules, adapting effortlessly to varied transport needs. True-tracking swivel and fixed castors provide smooth manoeuvring on demanding routes, while deep-drawn stainless steel beads guarantee durability and hygienic operation. The Isobox Flex M optimises long-distance food delivery with one spacious compartment accommodating 19 GN 1/1 containers. Durable, ergonomic, and configurable, this product family from Hupfer Metallwerke GmbH & Co. KG enhances efficiency and food quality in catering logistics.

- Insulated housing with special insulation ensures excellent temperature retention for hot and cold food components
- Mounting system for neutral, cooling and heating modules enables quick, tool-free module replacement for versatile temperature control
- True-tracking mobility with swivel and fixed castors provides smooth
