we make work flow

### Technical data

<b>Payload:</b>	250 kg
<b>Weight:</b>	135 kg
<b>Width:</b>	3000 mm
<b>Depth:</b>	650 mm
<b>Height:</b>	1000 mm

*Similar to illustration, technical modifications reserved. Without decoration.*

The sink is used for the pre-cleaning of medical instruments.

The freestanding sink table made of high-quality stainless steel is designed for the thorough pre-cleaning of medical instruments. The Hupfer sink table is a central component in hospitals, laboratories, practices, and other medical fields. The welded, open frame construction made of stainless steel square tubing is torsionally rigid and robust. The all-round edging and rear upstand of the washing and working surface ensure easy cleaning and perfect hygiene. The reinforcement of the working surface provides vibration-free stability and dampens potential working noises. Height-adjustable plastic feet allow for compensation of potential floor unevenness and ensure a secure stand. A loosely hung and removable lower wire mesh shelf serves as a convenient storage area and provides good ventilation and quick drying for the items placed on it. The sink table is available with one, two, or three sinks in different dimensions and optional cupboard bases. For individual, special requirements such as hollow instruments, various fittings and spray taps with water or air pressure are available.

- Welded construction ensures torsional rigidity and robustness - The backing of the wash and work surface provides vibration-free stability and dampened working noises - All-round edging guarantees easy cleaning and perfect hygiene - Height-adjustable feet allow for compensation of potential floor unevenness and ensure a secure stand - Additional options allow for expansion and adaptation to individual requirements
