Sink unit 2000×700×900 mm

P/N: 7506195 | ST AH50 2B 2000/700/900 001

HUPFER
we make work flow

Technical data

Payload:	200 kg
Weight:	60 kg
Width:	2000 mm
Depth:	700 mm
Height:	900 mm

Similar to illustration, technical modifications reserved. Without decoration.

The sink is used for the pre-cleaning of medical instruments.

The freestanding sink table made of high-quality stainless steel is designed for the thorough pre-cleaning of medical instruments. The Hupfer sink table is a central component in hospitals, laboratories, practices, and other medical fields. The welded, open frame construction made of stainless steel square tubing is torsionally rigid and robust. The all-round edge bending and rear upstand of the sink and work surface ensure easy cleaning and perfect hygiene. The underlay of the work surface provides vibration-free stability and dampens possible working noises. Height-adjustable plastic feet allow for compensation of potential floor unevenness and ensure a secure stand. A loosely hung and removable lower wire mesh shelf serves as a convenient storage area and provides good ventilation and quick drying of the placed items. The sink table is available optionally with one, two, or three sinks of different dimensions and optional cupboard bases. For individual, special requirements such as hollow instruments, different fittings and pendant sprays with water or air pressure are available.

- Welded construction ensures torsional rigidity and robustness - Underlay of the wash and work surface provides vibration-free stability and dampened working noise - All-round edging guarantees easy cleaning and perfect hygiene - Height-adjustable feet allow for compensation of potential floor unevenness and ensure a secure stand - Additional options allow for expansion and adaptation to individual requirements
