Technical data

Payload:	200
Weight:	84 kg
Width:	724 mm
Depth:	754 mm
Height:	1464 mm

Similar to illustration, technical modifications reserved. Without decoration.

Transport cart for the transport and storage of sterile goods in containers or baskets. Stainless steel wheel 160 mm as standard. Including sign holder.

Cart made entirely of high-quality stainless steel, stable, self-supporting and hygienic construction. Single-walled, fully enclosed cart body in fully welded, wash-down suitable design. Reinforcement of the cart roof through upward cross bracing. Double-walled swing doors with continuous seals that open 270°, automatic locking mechanism, operable with one hand. Door lock via integrated 2-point locking system. Interior with removable and height-adjustable closed pads across the entire interior height. Four vertical push rods (2 on each side) for maneuvering even with the doors open. Impact protection through a sturdy continuous bumper strip with end cut-outs for any towing device on the chassis, effective even with the doors open. Cart movable on 2 swivel castors with total brake, 2 fixed castors, secured with multiple screwed mounting plates.

- Stainless steel construction ensures durability and facilitates thorough cleaning for optimal hygiene
- Height-adjustable shelves provide flexible storage options and efficient organisation of sterile goods
- Doors located within the body enhance protection and maintain sterility during transport
- 270° opening doors allow easy access and quick loading or unloading of

contents

- Robot-welded seams create smooth surfaces that prevent dirt accumulation and simplify cleaning
- Circumferential bumpers protect the cart from impacts and prolong operational lifespan
- Robust torsion-resistant design guarantees stability and safe handling in demanding environments
- Push bars enable ergonomic manoeuvrability, improving user comfort and control
- No undercuts or dead spaces eliminate contamination risks and support thorough washing processes
