Technical data

Payload:	30
Capacity:	50 W
Supply voltage:	230 V
Nominal current:	0,5 A
Protection class:	Class I
Frequency:	50 Hz
Weight:	68 kg
Width:	724 mm
Depth:	690 mm
Height:	710 mm

The refrigerated well for central cooling is used for the presentation and dispensing of food in a chilled state. The refrigerated well also allows for easy access and efficient distribution of the stored products.

The Hupfer Refrigerated Well for Central Cooling is the perfect solution for presenting and dispensing chilled food items. Crafted from high-quality stainless steel, this robust unit ensures durability and long-lasting performance in demanding catering environments. Corrosion-resistant properties maintain both aesthetic appeal and hygiene standards, while easy-to-clean surfaces promote optimal cleanliness essential for food safety. The refrigerated well's sturdy design withstands heavy loads, allowing for safe transportation and efficient distribution of stored products. With its eco-friendly materials, the Hupfer Refrigerated Well supports sustainability efforts while enhancing the professional appearance of your catering logistics. Experience the perfect blend of functionality and elegance with this essential addition to your commercial catering setup.

- High-quality stainless steel construction ensures durability and long-lasting performance in demanding environments.
- Corrosion-resistant properties maintain aesthetic appeal and hygiene standards over time.
- Easy-to-clean surfaces promote optimal hygiene, essential for both catering and medical applications.
