

Refrigerated well GN 2/1 for centralised cooling

HUPFER
we make work flow

P/N: 8900540 | KW UTK ZK ER GN 2/1 - 710

Technical data

Supply voltage:	230 V
Protection class:	Class I
Frequency:	50 Hz

Similar to illustration, technical modifications reserved. Without decoration.

The air-cooled refrigerated trough for central refrigeration is designed for the presentation and dispensing of chilled food at consistently low temperatures. The refrigerated trough for central cooling allows for efficient organisation and distribution of the stored products.

The Hupfer cooling basin for central refrigeration is the ideal solution for the appealing presentation and distribution of chilled foods. This air-cooled cooling basin ensures uniform cooling through its laminar air curtain, preserving the freshness and quality of the products. The practical installation frame allows for easy integration into existing systems and enhances flexibility in use. Made from high-quality stainless steel, the cooling basin not only offers high hygiene standards but also easy cleaning and durability. Ideal for efficient organisation and distribution in the catering industry. Experience the highest quality and functionality in food presentation with the Hupfer cooling basin.

- Recirculating cooling with a laminar air curtain ensures even cooling and maintains freshness and quality.
- The installation frame allows for easy integration into existing systems and increases flexibility in use.
- Stainless steel ensures high hygiene, easy cleaning, and durability of the product.
