<b>Weight:</b>	30 kg
<b>Width:</b>	1975 mm
<b>Depth:</b>	400 mm
<b>Height:</b>	2000 mm

The standing shelf is used for storage and optimising space utilisation. The shelf can support high loads and is suitable for use at an ambient temperature of -30°C. The closed plastic pads of the Norm 12 shelf provide a lightweight, stable, and hygienic surface. The set includes 4 pads per shelf section.

The Hupfer Norm 12 standing shelf is a lightweight construction made from a combination of aluminium and plastic. The shelf offers a very easy-to-clean, clear, and accessible storage solution for organisation in your logistics.

The modular design allows for a needs-specific configuration for a variety of spatial conditions and temperature environments, thus ensuring maximum space efficiency. Uneven floors and temperatures of -30°C are not a problem even in the long term. The shelf is easy to assemble and can be extended at any time in a straight line or at an angle, easily adapting to changes in logistical operations.

The effortlessly hung, closed plastic surface provides a lightweight, stable, and very easy-to-clean storage area, even dishwasher-safe. Despite its low weight, this surface can hold high loads.

The materials used are sustainable, 100% recyclable, and so valuable that Hupfer guarantees to buy back your entire shelf at the end of its service life.

- solid polymer shelf with low weight ensures safe, hygienic storage and clear

access at all times

- high-quality polymer workmanship allows for easy cleaning and perfect hygiene. It is even dishwasher safe.
- modular system allows for any design and extension and ensures the most efficient use of space
- valuable materials ensure sustainability and value retention
- robust construction guarantees high stability and high load-bearing capacity
- modular system ensures easy handling from assembly to cleaning with little effort
