hood made of grey polypropylene. Heating through stainless steel tubular heating element, infinitely variable using thermostat toggle switch on the equipment, with temperature limiter as per VDE. Current supply via a connecting cable set consisting of two connecting cables with earthed plug and equipment plug and an On/Off switch with integrated indicator light as disconnecter.

The Hupfer incounter basket dispenser EBST-KO/H 50-50 has the lowest space requirements in comparison to other products. The guide basket, which comes as series standard, is the same as the non-rusting, stainless steel crockery baskets available as an optional accessory. The removable basket guarantees easy access to the interior in order to adjust the spring and for cleaning. The on/off switch can be conveniently integrated into the worktop and requires a cut-out measuring 30 x 22 mm.
