| <b>Width:</b>                                  | 1875 mm                                 |
| <b>Depth:</b>                                  | 510 mm                                  |
| <b>Height:</b>                                 | 1800 mm                                 |

The stationary shelving is designed for storage and to optimise space utilisation. The shelving has a particularly high load capacity and is suitable for continuous use at ambient temperatures ranging from -40°C to +60°C. The wire shelf of the shelving norm 35 provides a well-ventilated, stable and hygienic storage surface. The set contains 4 shelves per shelf section.

The Hupfer Norm 35 stationary shelving offers a clearly arranged storage solution that has been reinforced to offer high load-bearing capacities for organised logistics. The modular design allows for a needs-specific layout for a wide variety of spatial and temperature conditions, thereby ensuring the most efficient use of space. Uneven floors and temperatures from -40°C up to +60°C are no problem, even on a permanent basis. The shelving is easy to assemble and can be extended at any time in a straight line or even around corners and is easily adapted to changes in everyday logistics. Lateral bracing bars increase stability and allow for loading with heavy loads. The wire shelf, which can be hooked in effortlessly, is made from high-quality stainless steel and provides a ventilated, stable and easy-to-clean storage surface while also offering particularly high load-bearing capacities. The materials used are sustainable, 100% recyclable, and so valuable that Hupfer guarantees that it will buy back all of your shelving at the end of its useful life.

- lateral bracing bars also reinforce the shelving and allow for particularly high load-bearing capacities
- wire shelf ensures well-ventilated, safe and hygienic storage and keeps the stored goods in peak condition

## Stationary shelving set norm 35 with wire shelf

P/N: N35DR19005101800 | RS-N35-DR/1900×510×1800

- high-quality stainless steel workmanship enables easy cleaning and perfect hygiene
- modular system allows for any design and extension and ensures the most efficient use of space
- valuable materials ensure sustainability and value retention
- robust construction guarantees high stability and particularly high load-bearing capacity
- modular system ensures easy handling from assembly to cleaning with little effort
