Sterile supplies basket for transport, storage and provision of sterile supplies in soft packages, without container insert, also suitable for holding the HUPFER® compound sieve.

Basket in sterilisable version, suitable for washing devices, made of high-quality electro-polished stainless steel round material. Two frontal foldable carrying brackets enable the baskets to be stacked either into one another (when empty, e.g. in the cleaning or disinfection equipment) or onto one another (when filled).

The Hupfer sterile supplies basket ISO-1/1 features welded wire loops under the centre of the upper frame, providing particular protection from damage to packaged sterile supplies as well as maximum occupational safety for the service staff.
