

Plenty of space in confined areas

Nested instrument tables

Whether for use in surgery or in sterile services management for medical devices – HUPFER®'s instrument tables represent the ideal solution for small rooms with limited space. They offer additional storage and work surfaces and, if not needed, they can be pushed together to save space in an instant. The stable stainless steel design and precision finishing comply with the most stringent requirements for load-bearing capacity and hygiene and ensure durability that is second to none.

Advantages and benefits at a glance:

- additional storage and work surfaces when used separately
- extremely compact as can be nested
- very easy to clean and disinfect
- sturdy tubular construction in jointless square tubing 25 x 25 mm
- four antistatic castors, two of which can be fixed in position, in chrome-galvanised housings, dia. 125 mm
- also available as individual tables

The instrument tables are available both in a set of three and as individual tables.

Size W x D x H in mm	Order no.
1200 x 550 x 920	7505707
1050 x 550 x 880	7505708
900 x 550 x 840	7505709

All details/sizes are approximate; technical specifications subject to change without notice.
