

Hupfer's instrument baskets: proven quality made in Germany

Founded in 1870 in Zeitz, Saxony-Anhalt, Hupfer is now one of the leading specialists for sterile supplies logistics. Over 550 employees in our headquarters in Germany and in subsidiaries all over the world breathe life into the balancing act between tradition and innovation.

Together, we develop the best solution

Our headquarters in Coesfeld, Westphalia

3-D, laser, robotics: in use here every day

Experience ensures quality:

Our quality management system is certified as compliant with DIN ISO 13485. This means that we fulfil the highest expectations, especially when it comes to the manufacture of medical products. We are also certified by the FDA as a contract manufacturer. We offer our customers validated production processes that have been tested for safety.

Advantages at a glance:

- Made in Germany
- Cutting-edge, automatic production line
- Traceability right back to the origin
- Consistent, certified quality

We create customised, safe solutions.

Do your customers wish to store and prepare instruments safely in compliance with the MDR?

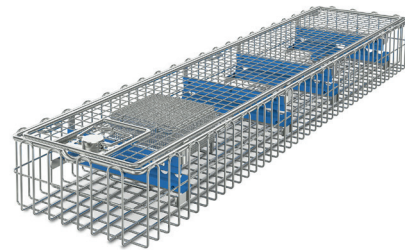

In addition to proven solutions, we also manufacture individual instrument baskets for specific requirements on request. We offer decades of expertise in the area of special developments for storing instruments. dwg or STEP data are all we need to develop the optimal way of storing a device.

Precision is our thing

Off-the-rack solutions? Other companies can offer those. In our plant in Coesfeld, Westphalia, a seasoned team of experienced colleagues is waiting to find the optimal solution for you.

Our cutting-edge production line and the know-how of our experts ensure that we can also manufacture customised instrument baskets with individual fixing elements for complex instruments.

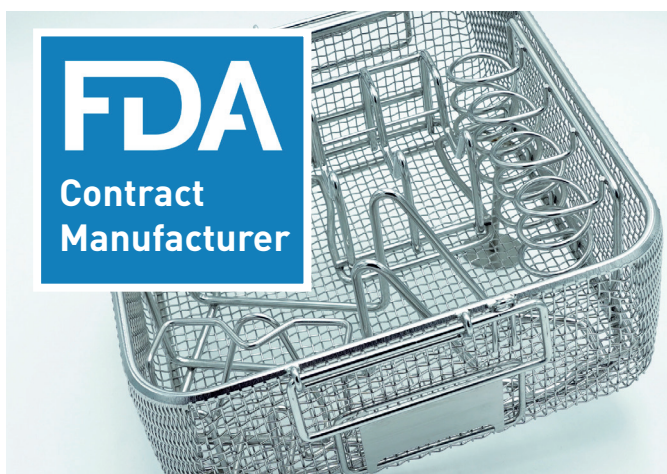

We create quality that you and your customers can rely on. This is proven by the successful certification of our quality management system according to **DIN ISO 13485**; our products also comply with the current European Regulation on medical devices, **MDR 2017/745**.

Because every millimetre counts:
our endoscopic baskets are precisely tailored to these high-quality instruments

Customised production
we develop individual solutions for individual requirements

Safety – signed and sealed:
our instrument baskets have been tested and certified multiple times

Reaching our destination together

The development of a customised instrument basket is always completed in close consultation with you: What must the basket be able to do? What else would be desirable? What other optimisations can be made?

Mutual confidentiality is guaranteed so that valuable knowledge remains where it belongs.
