

Reliability & Quality
Decades of experience in hygiene-critical areas.

Modular Design
All products are customisable and expandable.

Durability & Cost-effectiveness
Stainless steel with maximum durability for a sustainable investment.

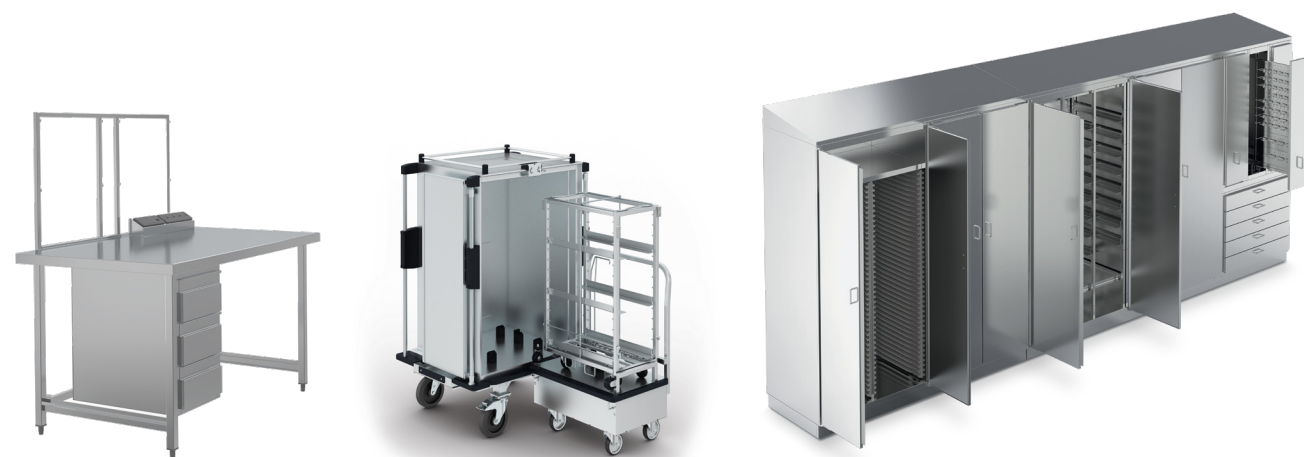

Hygienic Design
Compliant with international cleanroom requirements for maximum cleanliness and safety.

Customised Solutions
Customised products for specific cleanroom requirements.

For decades, Hupfer has stood for outstanding manufacturing quality in hygiene-critical areas. Our stainless steel products set standards in the design of cleanroom solutions – with state-of-the-art technology, robot-assisted precision and uncompromising hygiene.

With our products and system solutions, we optimise workflows, improve occupational safety and ease of cleaning, thereby achieving the highest hygiene standards.

HYGIENE AT ITS BEST

Stainless Steel Equipment for
Cleanrooms and Hygiene Areas

www.hupfer.com

DESIGN WITHOUT COMPROMISE

Hygienic Design made by Hupfer.

As a manufacturer of high-quality stainless steel equipment for areas with high hygienic requirements, we understand your needs.

Every detail of our products is designed to meet the highest cleanroom requirements. Whether it's seamless and fully welded body designs, perfectly welded seams thanks to robot-assisted welding processes, or durable constructions that are robust and resistant to chemical and mechanical stress – Hupfer offers hygienic design without compromise.

Hygiene starts with the material. Stainless steel is the preferred material in cleanrooms due to its corrosion resistance, durability and ease of cleaning. Hupfer relies on high-quality stainless steel, which offers excellent cleaning properties specifically for hygienically demanding applications.

With Hupfer, you can rely on the highest quality workmanship and innovative hygiene concepts – for cleanroom solutions you can count on.

OUR SOLUTIONS FOR CLEANROOMS AND HYGIENE AREAS

Hupfer offers a wide range of stainless steel equipment for use in highly sensitive cleanroom environments. Our products meet the highest hygiene requirements, are durable, easy to clean and support efficient work processes.

WORK TABLES – MAXIMUM ERGONOMICS

Our stainless steel work tables are specifically designed for use in cleanrooms and are available in various variants:

- **Standard work tables:** Robust and hygienic construction for general work areas.
- **Height-adjustable tables:** Ergonomic and electrically adjustable.
- **Movable tables:** Flexible use or for easier cleaning.
- **Tables with media columns:** Integrated connections for electricity, compressed air or data technology, ideal for workstations with technical peripherals.
- **Supplemented by hook system:** Optimal for the provision and organisation of consumables.

SHELVING SYSTEMS – MORE STORAGE SPACE FOR YOU

Our stainless steel shelves are designed for optimal material organisation in cleanrooms:

- **Standard shelving:** Expandable moduls, available in various dimensions and load classes.
- **Easy Rider systems:** Maximises storage capacity through compact storage – doubles storage space without the need for fixed floor rails.
- **Hygienic shelving:** Open design for improved air circulation and reduced particle accumulation.
- **Antistatic variants:** Minimisation of electrostatic charge to prevent particle adhesion.

CABINETS – CLOSED STORAGE FOR CLEANROOMS

Our cabinets offer optimum protection for sensitive materials and work equipment:

- **Closed cabinets:** Dust and particle-proof with easy-to-clean surfaces.

TRANSPORT EQUIPMENT – SAFE AND HYGIENIC MATERIAL HANDLING

Hupfer offers a wide range of stainless steel transport trolleys for internal transport in cleanrooms:

- **Open transport equipment:** For easy and flexible material handling.
- **Fully welded, closed trolleys:** Protected transport solutions for sensitive goods.
- **Känguruh systems:** Trolley-in-trolley principle for contamination-free material exchange between cleanroom zones.
- **Expertise in refrigerated and heated transport:** Ideal for temperature-sensitive products.

BASKETS & CONTAINERS – SAFE TRANSPORT AND STORAGE

Our stainless steel baskets and containers are suitable for storing and transporting small containers:

- **Wire baskets:** Various sizes, autoclavable, optionally with silicone fixings

HOOK SYSTEMS – ORDER AND QUICK ACCESSIBILITY

Our modular hook systems offer a flexible option for material provision:

- **Wall hooks:** Optimal use of vertical space.
- **Hook trolleys:** Individually customisable, mobile, suitable for various applications.

WASTE COLLECTORS – EFFICIENT DISPOSAL SOLUTIONS

Our stainless steel collection systems ensure hygienic waste disposal:

- **Foot-operated waste collectors:** Touch-free use to prevent cross-contamination.

More than
150 years

experience as a manufacturer
of stainless steel equipment for
hygienically demanding areas.

Highest
process reliability

through DIN EN ISO 9001 and
13485 certifications. Additional-
ly certified by the FDA.

Quality
Made in Germany

Every product is designed and
