

## HUPFER® Defrosting trolley RTWz 10-6 - controlled, hygienic defrosting of deep-frozen foods

A simple principle convincingly put into practice:

Food is defrosted in a perfectly hygienic manner in four trays filled with crushed ice. The melt water flows through removable perforated sheet metal shelves into the tray located under each one. Through openings in the trays and the hoses installed underneath them, the melt water flows safely into the bottom tray which serves as a collecting tray. This construction prevents contact between the melt water and the food - a decisive factor in maintaining hygiene. The corrosion-resistant stainless steel steering castors are ideally suited for use in cold stores and wet areas.

Model:	Defrosting trolley
Designation:	Defrosting trolley RTWz 10-6 / H: 1650
Order no.:	0121388
Number of defrosting trays:	4
Number of melt water trays:	1
Dimensions of the defrosting trays W x D x H:	1001 x 546 x 140 mm
Chassis:	4 corrosion-resistant stainless steel steering castors, of which 2 are fully lockable, Ø 125 mm
Total weight-bearing capacity:	ca. 200 Kg
Outer dimensions W x D x H:	1069 x 670 x 1650 mm

The melt water flows through the hoses directly into the tray outlet. Contact with the food is avoided. The hoses can be cleaned thoroughly or, if necessary, can simply be replaced.

The collected melt water can be conveniently drained from the collecting tray via the discharge tap and can flow directly into a floor drain. This saves time and effort.

The easily removable perforated sheet metal shelves permit optimum cleaning and easy handling. The individual defrosting trays can be mounted as desired at intervals of 150 mm.

All details / dimensions are approximate. We reserve the right to make technical changes. © HUPFER® 2012
