

Aluminium tray clearing trolleys - TAWALU - New option of side walls covered in blackboard paint.

Is there anything you wish to tell your guests as they return their food trays? If so, the side walls of the TAWALU aluminium tray clearing trolleys from HUPFER® can be covered in blackboard paint. In much the same way as a school blackboard, you can write on these sidewalls using chalk. Anything that has been written on this surface can be altered very quickly at any time.

This option is available on all of the more than 200 different HUPFER®TAWALU models for GN, EN, universal and trapezoidal trays with different holding capacities.

Of course, this design alternative still includes the usual equipment options such as e.g. handles, rear wall or clear acrylic doors.
