

One for all: The universal holder for pump bottles

Very simple to operate – no hand contact whatsoever

No squeezing half-empty bottles, no dribbling, no hand contact – the new universal holder from Hupfer, for disinfectant and other dispensers, can be conveniently operated with your elbow alone.

Refilling: clean and fast

Easy and clean refilling is now also guaranteed: flip the holder up, remove the empty bottle, insert a refilled bottle, flip the pump bracket down again, and that's it!

Flexible height adjustment

The height can be adjusted to the bottle using just two screws. Once you have adjusted the height, it can be fixed and the bottle inserted.

Extra flexibility

A special highlight:
the holder height can be **adjusted manually**
and it fits all sorts of
different bottles!

Use it for disinfectant, washing lotion or liquid soap: all types of EN bottles, rectangular, round, half-litre and litre bottles, disposable and reusable containers will fit in the holder.

For polymer bottles, e.g.

- rectangular 500 ml
(ca. 70 x 55 x 160 mm)
- rectangular 1000 ml
(ca. 90 x 75 x 190 mm)
- round 1000 ml
(ca. Ø 90 x 200 mm)

(measurements always exclude pump height)

Technical Data

Model: Universal hygiene dispenser for bottles
with pumping equipment (Art. 8600138)*

Measurements approx.: 120 x 198 x 238-300 mm
Net weight: 0,88 kg
Adjustment range for
dosing lever approx. 210 – 270 mm

*Pump bottle *not* included!

Don't give thieves a chance:

As an option, the bottles can be
easily secured to the holder
using a cable tie.
