HUPFER
we make work flow

Isobox from Hupfer THE SPACE-COOLING- HEATING-TRANSPORT- DESIGN-WONDER

The daily requirements in food transport are diverse: Transporting food safely from the kitchen to the guest, both inside and outside the facility, while maintaining temperatures and making a good visual impression. Hupfer has an answer to these challenges.

The Isobox Mobil Flex. A food transport box that can be easily customised to individual requirements and eliminates any concerns about temperature. With its robust construction, the box is characterised by exceptional resilience and reliability, not to mention its attractive design.

THE ISOBOX IN FIGURES

10 models

offer a wide range of designs for different applications

17 colours

for a customised design of the doors, rear panels and side panels

3 modules

can be inserted into the compartments as neutral, heating or cooling modules as required

up to **60** insertions

offer plenty of space in a small area for GN containers in various sizes

ONE PRODUCT, MANY COMBINATIONS

The Isobox can be used flexibly thanks to heating and cooling modules that can be moved and inserted and precisely adjusted using the digital controller.

- **Keep warm:** The convection heating heats the interior up to 90 °C in a very short time.
- **Keep cold:** The cooling module with robust peeling technology cools the interior to +4 °C within a short time.
- **Combine:** First keep warm, then keep cold, keep warm and cold at the same time, on top of each other or side-by-side, depending on the model and design.
- **User-friendly:** Intuitive control thanks to user-friendly operating elements.

Warming module - Keep food reliably warm

Cooling module - Keeping cold food at a safe temperature

Neutral module - Can be retrofitted with active cooling or heating

Lockable doors: 270° pivoting doors are securely held open by a magnet.

Hygienic: Easy to clean, stainless steel beaded walls.

230V power: One socket is sufficient for the Isobox to reliably maintain the selected temperature in stationary operation.

Perfectly insulated: High-quality insulation for energy-efficient use of the Isobox. Low temperature loss and minimal influence on neighbouring compartments.

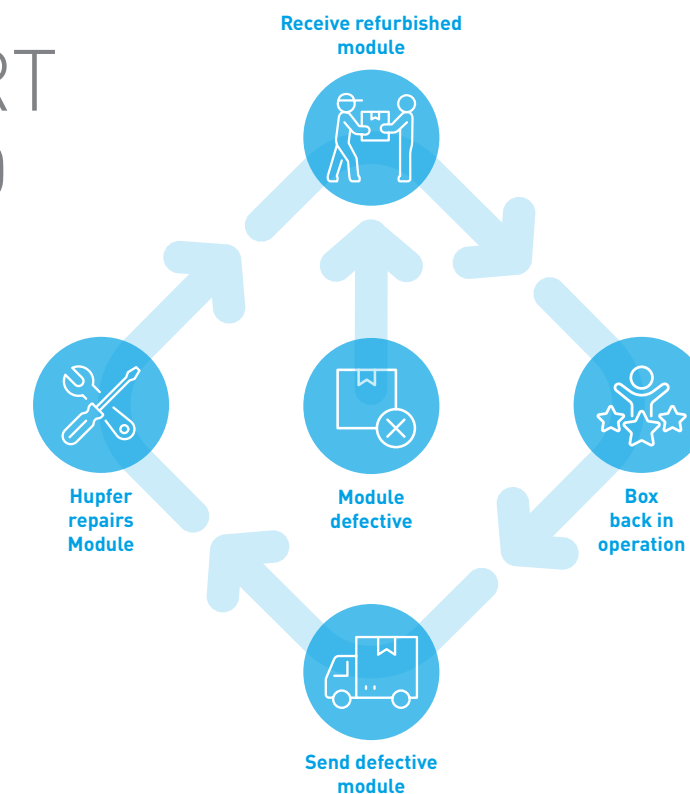

Ergonomic: Integrated push handles offer optimal ergonomic features and ideal handling.

All-round protection: Solid corner bumpers provide sufficient protection for the Isobox and walls. Optional: Lorry transport securing

FOOD TRANSPORT INNOVATIVE AND SUSTAINABLE

- **Future-proof:** React spontaneously to changing requirements with the help of the modules, which can be exchanged without tools. Simply change the temperature, not the appliance.
- **Security:** Simply replace defective modules with refurbished modules and remain cost-effective. No more service calls necessary.
