

DaVinci basket in stainless steel

Endoscope basket to protect the sensitive Xi optics of the DaVinci system

This DaVinci basket is the ideal solution for preparing, storing, transporting and protecting the sensitive optics of your DaVinci system. It is placed in a purpose-made retainer that gives it optimum protection against slipping and damage during the entire cycle. The removable cover is fitted with a special twist fastener that prevents it from being opened accidentally and is easy to use.

The basket is fitted with a particularly stable ocular lens holder and a channel for the optical cable in order to protect the instrument.

Like all HUPFER® endoscope baskets, this DaVinci basket also combines exceptional protection for expensive instruments with maximum ease of use.

Advantages and benefits at a glance:

- Extremely sturdy and long-lasting thanks to first-class design and manufacture
- Smooth, clean edges prevent damage to the packaging material
- Outstanding ease of cleaning, disinfection and sterilisation
- The fixed cable holder and replaceable silicon inserts serve to lock the instrument in place perfectly
- Basket and holders are suitable for washer-disinfectors and sterilising
