The wire mesh shelf provides a ventilated surface for sterile goods in a sterile goods trolley.

The wire mesh shelf, which can be effortlessly hung in a sterilisation cart, is made of high-quality stainless steel and provides a well-ventilated and easy-to-clean surface. The Hupfer wire mesh shelf guarantees a safe and stable surface for the transport of sterile goods. The robust construction from high-quality, electropolished wire mesh ensures a long service life and optimal hygiene. The simple handling allows for effortless hanging and removal of the shelf.
