Hupfer enables the easy transportation of goods through the use of swivel castors. These assist in the efficient organisation and movement of loads in various logistical processes.

Discover the Ø125 mm swivel castor from Hupfer – the perfect solution for the medical sector! This high-quality swivel castor features a robust stainless steel housing that guarantees durability and safety. The integrated ball bearing ensures effortless mobility, while the antistatic function enhances safety in sensitive environments. With the Ø125 mm swivel castor, you can optimise your logistics for sterile goods. It facilitates sorting and transporting, allowing you to focus on what matters most – caring for your patients. Choose Hupfer's swivel castor for efficient and reliable solutions in your facility!

- **Back hole with ball bearing:** Ensures effortless and precise mobility.
- **Antistatic properties:** Reduces the risk of electrical discharges and protects sensitive devices.
- **Stainless steel housing:** Offers high corrosion resistance and durability for use in demanding environments.
- **Diameter of 125 mm:** Optimal size for versatile applications in logistics and catering.
