Open tray dispenser with height-adjustable platform for storing two stacks of GN 1/1 or EN trays.

Dispenser in self-supporting and hygienic design, made of high-quality stainless steel. Open tube frame design with panellings at the face sides and removable, high-quality stainless steel platform with ball bearing platform guide. Consistent output height thanks to manually adjustable stainless steel tension spring system. One frontal push bar made of ergonomically-shaped stainless steel round tube. Four massive polymer corner bumpers at the bottom dispenser corners serve as bumpers and protect the equipment within these sections on all sides as well as building-side walls from being damaged. Dispenser runs on 4 swivel casters of which 2 with total locks, ø 4.9" (125 mm), fastened by means of screw-on plates and several screws.

The Hupfer tray dispenser TA 2/53-37 has the smallest external dimensions and the lowest empty weight in comparison to other products, ensuring optimal handling properties at the same time as a very high load limits. The installation height of 900 mm is the standard working height in food distribution.
