The spacers connect the shelving units together and ensure a stable stand for the shelf.

The spacers made of high-quality stainless steel ensure a stable connection of the shelf supports. They increase the stability of the shelving structure and prevent the shelf supports from touching each other. The simple assembly allows for effortless adjustment of your shelving system to your needs. The materials used are sustainable, 100% recyclable, and so valuable that Hupfer guarantees to buy back your complete shelf at the end of its useful life.

- increase the stability of the shelves
- for a secure connection of the shelf supports
- easy assembly
- use of high-quality stainless steel ensures durability and robustness
