Transport cart for the transport and storage of sterile goods in containers or baskets. Stainless steel wheel 160 mm as standard. Including sign holder.

Cart made entirely of high-quality stainless steel, stable, self-supporting and hygienic construction. Single-walled, fully enclosed cart body in fully welded, wash-down suitable design. Reinforcement of the cart roof through upward cross bracing. Double-walled swing doors with continuous seals that open 270°, automatic locking mechanism, operable with one hand. Door lock via integrated 2-point locking system. Interior with removable and height-adjustable closed pads across the entire interior height. Four vertical push rods (2 on each side) for maneuvering even with the doors open. Impact protection through a sturdy continuous bumper strip with end cut-outs for any towing device on the chassis, effective even with the doors open. Cart movable on 2 swivel castors with total brake, 2 fixed castors, secured with multiple screwed mounting plates.
