Технические характеристики

Показан пример без декоративных элементов, точность технического описания не гарантируется.

Размер ячейки:	150 mm
Max. bay load	150
Max. section load	600
Carbon footprint (TM65 Midlevel Report)	612 kgCO ₂ e
TM65 Midlevel Report	Ссылка на сертификат
Масса:	43 кг
Ширина:	3350 мм
Глубина:	400 мм
Высота:	1800 мм

The stationary shelving is designed for storage and to optimise space utilisation. The shelving has a high load capacity and is suitable for use at an ambient temperature of -30°C. The louvred shelf, made from polymer, of the shelving norm 12 provides a ventilated, stable and hygienic storage surface. The set contains 4 shelves per shelf section.

The Hupfer Norm 12 stationary shelving is a lightweight structure made from a combination of aluminium and polymer. The shelving offers a clearly arranged and easily accessible storage solution for organised logistics. The modular design allows for a needs-specific layout for a wide variety of spatial and temperature conditions, thereby ensuring the most efficient use of space. Uneven floors and temperatures from -30°C are no problem, even on a permanent basis. The shelving is easy to assemble and can be extended at any time in a straight line or even around corners and is easily adapted to changes in everyday logistics. The easy-to-install, louvred shelf provides a ventilated, stable and very easy to clean shelf surface. It is even dishwasher safe. This shelf holds heavy loads despite its light weight. The materials used are sustainable, 100% recyclable, and so valuable that Hupfer guarantees that it will buy back all of your shelving at the end of its useful life.

- solid polymer shelf with low weight ensures ventilated, safe and hygienic storage and keeps the stored goods in peak condition
- high-quality polymer workmanship allows for easy cleaning and perfect hygiene. It is even dishwasher safe.

Stationary shelving set norm 12 with louvred shelf

HUPFER
we make work flow

- modular system allows for any design and extension and ensures the most efficient use of space
- valuable materials ensure sustainability and value retention
- robust construction guarantees high stability and high load-bearing capacity
- modular system ensures easy handling from assembly to cleaning with little effort
